

Information Security Risk Assessment Example- Heroland

This document provides an example of an Information Security Risk Assessment conducted for Heroland, a small company that supplies laptops to schools. It serves as a demonstration for an ISO 27001 Risk Management exercise.

Likelihood Scale: 1 (*Very Low*) to 5 (*Very High*) - Describing the probability of the threat exploiting the vulnerability.

Impact Scale: 1 (*Minor*) to 5 (*Critical*) - Describing the potential impact if the risk occurs.

Risk Value (Risk Score) formula: *Likelihood x Impact*.

Risk category: High >= 15, Medium 8-14, Low < 7

Asset	Threat	Vulnerability	Likelihood (1-5)	Impact (1-5)	Risk Category	Risk Value	Risk Owner	Notes
School Contact Database	Ransomware Attack	Weak passwords or missing MFA	3	5	High	15	IT Manager	Contains contact information, school details, order history, contract terms, and pricing agreements for school customers
Heroland Financial Records	Phishing	Insufficient employee training on phishing detection	2	4	Medium	8	Finance Manager	Systems containing Heroland's financial information, like invoices, payment details, and financial reports
Heroland Public Website	DDoS Attack	Inadequate or missing web application firewall	3	3	Medium	9	Marketing Manager	The website promotes Heroland’s services, allowing schools to order online
Employee Laptops	Loss or Theft	Full disk encryption not performed	2	3	Low	6	HR Manager	Laptops used by Heroland employees for daily work contain customer data, documents with sensitive data, etc.
Acer Supplier Account Information	Spyware	Weak login credentials or vulnerable plugins	3	4	Medium	12	Supply Chain Manager	Includes login credentials for Acer supplier portal, pricing lists and communication records with Acer
